

## CSC 2004: 29 August - 11 September 2004 in Vico Equense, Italy

### Programme Highlights

#### GRID Technologies

The Grid track delivers unique theoretical and **hands-on** education on some of the most advanced GRID topics.

#### Software Technologies

The Software track addresses the most relevant modern techniques and tools for large scale distributed software development and handling.

#### Physics Computing

The Physics Computing track focuses on informatics topics specific to the HEP community: databases, persistency technologies, and experiment simulation.

### Lecturers

Charles Bacon  
Dirk Düllmann  
François Flückiger  
Rudi Frühwirth  
Maria Girone  
Robert G. Jacobsen  
Alberto Pace  
Erwin Laure  
Alberto Ribon  
Andreas Pfeiffer  
Martin Liendl  
Heinz Stockinger  
Paolo Tonella
