CSC 2009: 17 August – 28 August 2009, Göttingen, Germany

Organized in collaboration with the Georg-August University of Göttingen and DESY

Programme Highlights

Data Technologies

The Data theme presents the state of the art technologies and options for data storing and management in specially demanding environment, through lectures and practical exercise sessions.

.

Base Technologies

The Base Technologies theme addresses the most relevant underlying technologies for software development security, networking, hardware architecture and virtualisation. The lecturers come from the USA and CERN to teach theory and organize practical work.

Physics Computing

The Physics Computing theme focuses on informatics topics specific to the HEP community. After setting-the-scene lectures, it addresses ROOT and data analysis technologies. It also offers a range of practical exercises on the topics.
