<tr>
<td>The Data theme presents the state of the art technologies and options for data storing and management in a specially demanding environment. It includes security and authentication aspects relevant to data management. The theme is equally divided between lectures and practical exercise sessions.</td>
<td>The Base Technologies theme addresses a selection of the most relevant underlying technologies: Software development security, Advanced networking, Computer architecture, Performance Tuning as well as virtualisation / cloud computing. It also offers a range of practical exercises.</td>
<td>The Physics Computing theme focuses on informatics topics specific to HEP. After setting-the-scene lectures, it addresses Software Engineering Techniques, ROOT and Data Analysis. The lecturers come from Austria, Croatia, Finland, the USA and CERN to teach theory and organize practical work.</td>
