

CSC 2012: 13 – 24 August, Uppsala, Sweden

Organized in collaboration with the SNIC-UPPMAX at the Uppsala University

Programme Highlights

Data Technologies	Base Technologies	Physics Computing
The Data theme presents the state of the art technologies and options for data storing and management in highly demanding environments. It includes security aspects relevant to data management. The theme is equally divided between lectures and practical exercise sessions.	The Base Technologies theme addresses a selection of the most relevant underlying technologies: software development security, advanced networking, computer architecture as well as virtualisation / cloud computing. It also offers a range of practical exercises.	The Physics Computing theme focuses on informatics topics specific to HEP. After setting-the-scene lectures, it addresses Software Engineering Techniques, and Data Analysis. The lecturers come from, Croatia, Norway, the USA and the UK to teach theory and practice.
